

UNIT 02 • APPLY & EXPLAIN

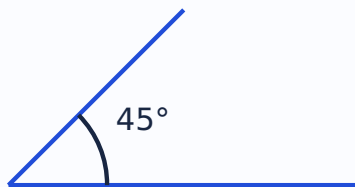

Lines and Angles

4. How many endpoints do a line, ray and segment have?

5. Two rays make a smaller angle of 80° . What is the reflex angle?

6. Why does lengthening the drawn arms not change an angle?

LOOK • REASON • REPRESENT

A turn, not a length

Name the angle type. Imagine making both arms longer: explain why the turn stays the same.

Pause and reflect

What can I explain now? What do I want to practise again?

☐ I tried ☐ I explained ☐ I checked
