one one

Checking counting activities

Quantity sheets

Pages 229-258 represent 1-30 in order. Check the set against its numeral, touching or marking each picture once. Pages 259-278 use mixed themes and categories; recount from a different starting point.

Marine themes

Pages 279-288 practise 1-10 in order. Choose the box with the named quantity and colour only figures labelled with the target numeral. Read the local instruction aloud.

Write and match totals

Pages 289-337: count, match and write. Cross off counted objects on a spare print if crowded. On page 337 agree the pictured marine category before counting; do not count an animal in two categories.
